Satellite Services for the Maritime Industry

# Maritime Industry meets Space

## 2<sup>nd</sup> MarSat Workshop

6 September 2018  
14:00 – 16:00

SMM Maritime Trade Fair  
Room A 4.3  
Hamburg, Germany

This workshop will provide an excellent platform to discuss challenges and solutions for the maritime industry in the digital era. The workshop will put a strong focus on the contribution of modern satellite capabilities (focus on Earth Observation), modeling services and data flows. Results of the 2.5 years research project MarSat will be showcased including the

support of arctic navigation with innovative ice information services (Ice-Pad: A portable Ice-Pilot Unit) and updates of ENC's using modern satellite analysis capabilities and voyage planning. The workshop will also offer deeper insights into the capabilities of modern satellite imagery and the use of imagery analysis with an emphasis on the maritime industry.

## Agenda

- 14:00 Welcome & Keynote
- 14:30 Ice-Pad: A portable Ice-Pilot Unit
- 14:55 Satellite-Derived Bathymetry and ENC's for efficient Voyage Planning
- 15:15 Related satellite services
- 15:30 Outlook & Discussion
- 16:00 End of Meeting

## Registration

The workshop is free of charge and sponsored by the MarSat project partners. A valid entry ticket to the SMM maritime trade fair is required.
